

We put the pressure on so you'll keep your cool.

Certified Copeland compressors undergo a rigorous pressurized "burst test" to ensure they meet, and even exceed, UL standards. "Burst tests" are our way of guaranteeing you and your consumer receive the best service compressor available. It's also one of the reasons why Copeland is a global leader of the HVAC industry.

So relax – Our burst tests ensure Copeland compressors won't melt under pressure.

Give Copeland your toughest test. We're built to take it.

Certified Copeland compressors are only available at Copeland Primesource Wholesalers.
