

AOFD 553 OIL FILTER-DRIER

AOFD is designed specifically for refrigerant systems that use POE oil. POE oil is hygroscopic in nature, which means that it attracts and absorbs water. Moisture in a closed system can produce acid and will harm the compressor. The AOFD protects compressors by removing moisture and trapping contaminants.

FEATURES

- ☆ Dual access fittings for determining pressure drop
- ☆ Designed to clean and dry POE Oil
- ☆ 3/8" male flare connections for easy replacement
- ☆ Large filter surface area to provide maximum filtration
- ☆ Contains 100% molecular sieve XH-9 Desiccant for moisture removal
- ☆ Designed to operate at a very low pressure drop
- ☆ 10 micron filtration for optimum oil cleaning
- ☆ CRN file number: OE0844.9 (see page A)

(Replaces AC&R S-4005)
