New ideas to ignite your business

Idea: Make your competitive advantage your operation.

Increase your profit margins without increasing your prices. Optimize your store operations and seize your competitive advantage with the help of Emerson Climate Technologies. Built on years of experience, Emerson works hand in hand with retailers to develop heating, cooling and refrigeration technology that enhances store operation efficiency – drastically reducing your energy costs and significantly increasing your bottom line. Without sacrificing comfort or food quality.

It's retail solutions for your retail business, from the most trusted name in the HVAC/R industry – Emerson Climate Technologies.

Idea: Bring in a new level of proven energy savings.

Emerson Climate Technologies™ has the services and technology to eliminate hidden inefficiencies and cut your retail energy bills by up to 9% a month. And with innovative energy-efficient solutions, like the Copeland Scroll™ and Computer Process Controls™ management systems, you can start saving right now.

When the legendary Copeland Scroll compressor powers your equipment, you'll have the technology you need to run at peak efficiency, every day.

For store environment and refrigeration management, Computer Process Controls provides on-site electronic administration. Refrigeration controls provide accurate monitoring of compressors and condensers, as well as overall refrigeration system integrity.

Computer Process Controls building controls manage the heating, cooling and humidity levels to maximize comfort and efficiency. Both the refrigeration and building controls enable remote communication with Emerson monitoring services and enhanced energy savings. In addition, they can prevent costly surcharges from power spikes with unique demand-shedding capabilities.

Idea: Stay alert with more effective store monitoring.

With our unique energy management and E-Commissioning™ programs, Retail Services provides a unique combination of hands-on services and remote monitoring to keep tabs on your building and refrigeration systems 24 hours a day. This ensures a more comfortable retail environment, along with better food quality, safety and shelf life. More importantly, it helps prevent refrigeration and climate control system downtime, giving you more time to sell to your customers.

If maintenance is required, we can automatically dispatch technicians, so you can deal with more important issues... like your business.

Idea: Optimize your operation with the Emerson advantage.

From around the world to around the corner, Emerson Climate Technologies delivers proven results to retailers. By combining comprehensive monitoring and consulting services with innovative technology, we can improve your operation to increase your bottom line and grow your business. Idea: Form a partnership today. Accelerate your business tomorrow.

There's a world of opportunity to enhance your store's operation and build your retail competitive advantage. And it all starts right here with Emerson. Unrivaled technology. Superior service. Ultimate solutions. It's time to harness new ideas and breakthrough services that do more than just grow your business. They ignite your business. It's time for Emerson Climate Technologies.

Air Comfort Products

Energy-efficient residential and industrial ceiling fans

Clive Samuels & Associates

Consulting engineering services including: electrical, HVAC, lighting, tele and data communications, refrigeration, fire protection, plumbing, commissioning, energy analysis and energy management

Computer Process Controls

Comprehensive electronic HVAC/R, lighting and energy management control systems for retail, institutional, office and food service applications

Copeland®

Industry-leading refrigeration and air conditioning compressors for commercial and residential applications

Design Services NetworkSM

Comprehensive heating, cooling and refrigeration engineering, design and testing services for HVAC/R, industrial and scientific equipment manufacturers

Distribution Services

Centralized aftermarket support for wholesalers, contractors and end-users, covering the full line of Copeland, Emerson Motors™ and Flow Controls products and services

Educational ServicesSM

Integrated HVAC/R technical training seminars and products for contractors and end-users

Emerson Motors

Leading producer of air moving motors and variable speed controls for the HVAC/R industry

Emerson Power Transmission™

World leader in quality bearing, V-belt drive and power transmission drive products

Flow Controls

Precision electronic and mechanical flow controls to monitor and protect refrigeration and air conditioning systems

Fusite®

Reliable hermetic glass-to-metal terminals, sight glasses and precision metal stampings

Retail Services

Customized retail facility services including remote equipment monitoring, service dispatch, food quality and safety monitoring, power monitoring, energy efficiency analysis and project management

Therm-O-Disc®

Proven reliable temperature controls, sensors, probes, switches and motor protectors for heating and air conditioning applications

Ventilation Products

Completely customizable ventilation systems, including industrial fans and blowers, for the optimal match to your application needs

White-Rodgers®

Your source for programmable thermostats, electronic and media air cleaners, humidifiers, universal gas valves and nitride ignition upgrade kits for most gas furnace HSI applications
