

It knows. So you'll know.

It waits in silence. Watching. Listening. Waiting for one false move... then it strikes! The unique diagnostic capabilities of the new Copeland PerformanceAlert™ compressor controller warn you of impending refrigeration problems. And that means you can fix them quickly, maintain peak system performance and protect your investment.

To learn more about Copeland PerformanceAlert and how it not only reduces downtime but also saves energy, please visit EmersonClimate.com/copelandperformancealert.
