

When Your Reputation Is on the Line

Turn to Technology You Can Trust

When your customers want climate control solutions they can count on, turn to the technology and expertise you can trust – Emerson Climate Technologies™. Our name is new, but Emerson Climate Technologies is built on decades of experience in developing innovative, energy-efficient HVAC products for residential and commercial use. At Emerson, we help you keep your customers comfortable and grow your business.

Technology You Can Rely On

Reliability. It's what homeowners and building managers expect from their HVAC systems. Emerson helps you deliver reliability with a full range of energy-efficient technology solutions you can stake your reputation on.

From ultra-reliable scroll compressors and programmable thermostats to high-efficiency electric motors and state-of-the-art energy monitoring, Emerson Climate Technologies is setting the pace with first-to-market features, comfort innovations and new services you can't find anywhere else. Emerson is also leading the way to cleaner air with new compressors and system protection devices specially designed for R-410A refrigerant, the environmentally friendly coolant that will become the industry standard in 2010.

Emerson Climate Technologies leads the way on tough issues that impact your business and your bottom line. Whether you're looking for next-generation technology to meet new efficiency standards or the answer to today's air quality concerns, get the support you need from Emerson.

A Partnership You Can Grow With

Emerson Climate Technologies has what it takes to get the job done, including a full line of cutting-edge technology to serve your customers' residential and commercial HVAC needs:

Proven Compressor Technology: Revolutionary Copeland Scroll™ compressors are designed for optimum efficiency and have been proven reliable in more than 30 million worldwide installations.

Programmable Thermostats: User-friendly digital thermostats are the "brains" behind the smartest HVAC systems.

Variable Speed Motors: Energy-saving fan and blower motors maximize the comfort and efficiency of any system.

System Protection Devices: Flow controls, TXV valves, filter driers and moisture indicators protect the system and keep it running at peak performance.

Building Controls: Advanced, electronic control systems optimize commercial equipment performance, ensuring the best in energy savings, comfort and food quality.

Energy Monitoring: Customized energy analysis and 24/7/365 equipment monitoring enables retailers to reduce their biggest operational expense.

Local product availability is the key to keeping your business on the go and satisfying your customers. Our extensive global distribution network gives you quick, convenient access to the right Emerson products, whenever and wherever you need them.

Many Emerson products are "Energy Star" labeled for their energy efficiency, which translates directly into savings for your customers.

Education You Can Build On

Technical training is more important than ever. Emerson's Educational Services group delivers comprehensive training programs that not only cover essential service skills, they also keep you up-to-date on emerging technology. From hands-on seminars to online tools, Emerson provides the training you need, at a time and place that fits into your schedule. Whether it's learning new techniques in HVAC system maintenance or implementing a comprehensive energy management program for supermarkets, Emerson Climate Technologies gives you the knowledge to succeed. Emerson is also a proud supporter of industry associations and certification programs.

Technology Makes It Easy. Emerson Makes It Better.

It's easy to do business with Emerson Climate Technologies. To learn more about what Emerson can do for you, visit **EmersonClimateContractor.com** and register for free access to our new website designed exclusively for contractors. You'll get immediate access to application support, troubleshooting tips and technical data, plus a complete wholesaler directory for locating the products you need quickly.

At Emerson, we're committed to developing technology that enhances your reputation and helps grow your business.

Emerson. Consider It Solved.™

EMERSON[™]
Climate Technologies

EmersonClimateTechnologies.com

Air Comfort Products

Energy-efficient residential and industrial ceiling fans

Alco Controls[®]

Precision electronic mechanical flow controls to monitor and protect refrigeration and air conditioning systems

Clive Samuels & Associates

Consulting engineering services including: electrical, HVAC, lighting, tele and data communications, refrigeration, fire protection, plumbing, commissioning, energy analysis and energy management

Computer Process Controls[™]

Comprehensive electronic HVAC/R, lighting and energy management control systems for retail, institutional, office and food service applications

Copeland[®]

Industry-leading refrigeration and air conditioning compressors for commercial and residential applications

Design Services Network[™]

Comprehensive heating, cooling and refrigeration engineering, design and testing services for HVAC/R, industrial and scientific equipment manufacturers

Distribution Services

Centralized aftermarket support for wholesalers, contractors and end-users, covering the full line of Alco[®], Copeland[®] and Emerson Motors[™] products and services

Educational Services

Integrated HVAC/R technical training seminars and products for contractors and end-users

Emerson Motors[™]

Leading producer of air moving motors and variable speed controls for the HVAC/R industry

Emerson Power Transmission[™]

World leader in quality bearing, V-Belt drive and power transmission drive products

Fusite[®]

Reliable hermetic glass-to-metal terminals, sight glasses and precision metal stampings

Retail Services

Customized retail facility services including remote equipment monitoring, service dispatch, food quality and safety monitoring, power monitoring, energy efficiency analysis and project management

Therm-O-Disc[®]

Proven reliable temperature controls, sensors, probes, switches and motor protectors for heating and air conditioning applications

Ventilation Products

Industrial fans and blowers

White-Rodgers[®]

Your source for programmable thermostats, electronic and media air cleaners, humidifiers, universal gas valves and Nitride Ignition upgrade kits for most gas furnace HSI applications

Emerson Climate Technologies is a proud sponsor of NATE.

EMERSON. CONSIDER IT SOLVED.[™]
