ProAct® REFRIGERANT MANAGEMENT

Record, manage, and comply.

ProAct® Refrigerant Management helps supermarket operators and even responsible service contractors organize their refrigerant-related inventory information quickly and easily. Retail Services' Refrigerant Management web-based software helps you effectively reduce labor costs and increase productivity of key personnel, while also minimizing refrigerant loss due to leaks, and improving inventory management. By providing all the proper documentation, ProAct® Refrigeration Management also helps operators close the loop between service personnel who complete the work and owners who have the responsibility for complying with the EPA's CAA 608 regulation.

More support. More opportunity.

With quick, convenient electronic access to all your refrigerant data you can:

- Receive automated alerts when leak trigger rates are exceeded, so that action can be quickly taken
- Track records of purchase, use, and disposal of all refrigerants, even by individual technicians
- Provide documentation of leak fixes
- Prove you've maintained refrigerant recovery equipment
- Record refrigerant cylinders that have been tested for leaks

Save time. Save money. Save headaches.

With the rising cost of refrigerants, it is important to track and manage how and when refrigerant is used within your facilities and by service technicians. With ProAct® Refrigerant Management, you'll gain the ability to better manage refrigerant usage costs, and quickly identify potential refrigerant leak related problems.

ProAct® now!

It's never been easier to understand and manage your refrigerant related costs and quickly identify and fix refrigerant leaks. But see for yourself. For more information on ProAct® Refrigerant Management or other ProAct® web-based software, call Retail Services today at 770-425-6232. Or visit us at ersus.com.
