

Filter Drier EK Filter Drier Filter Drier

Idea: Develop a filtration technology for stronger-than-ever air conditioning system protection.

You've just installed an air conditioning system. Now it's time to protect it. How? With unique filtration technology from Emerson Climate Technologies™: the EK Filter Drier. We created the new filter with one mission in mind: to take filtration protection to a new dimension, to deliver more reliable, longer-lasting protection from moisture and contaminants than ever before. We've succeeded. The EK Filter Drier, part of Emerson's UltraTech™ Home Series, delivers superior contaminant filtration. The result? Peak system performance – and confident, satisfied customers.

Idea: Make a filter that's ideal for the refrigerants of today – and tomorrow.

The EK Filter Drier offers unprecedented operational flexibility. It's an ideal solution whether you're using HCFCs, CFCs or newer HFC refrigerants. In fact, the EK Filter Drier is Copeland recommended for HFCs such as R-410A. Its beaded desiccants protect new POE oils from contaminants and quickly absorb and remove any moisture before acids can form. And there are a variety of available models to meet any system demand.

Idea: Protect your reputation along with the system.

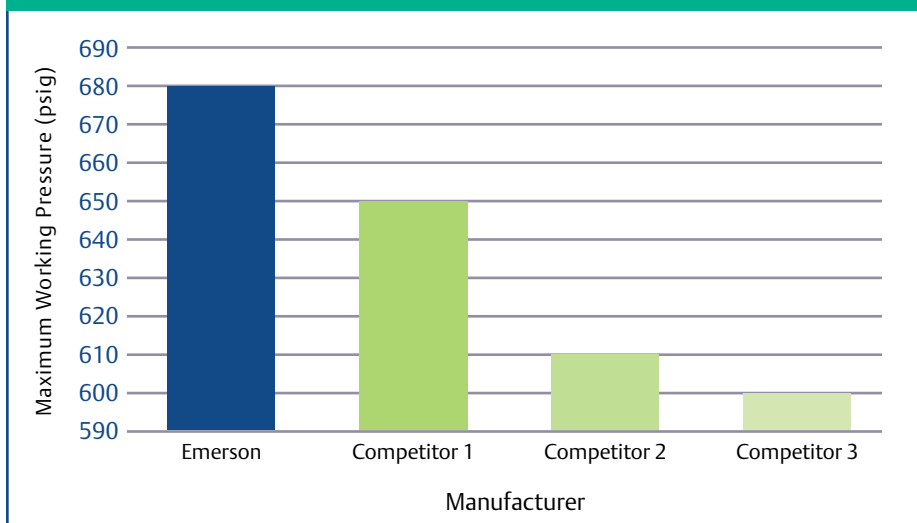

The EK Filter Drier protects more than air conditioning systems – it protects your reputation as well. Your customers expect nothing less than the best. The best technology. The best service. The best protection. And the EK Filter Drier lets you meet that demand. It's just what you'd expect from a recognized industry leader – Emerson Climate Technologies Flow Controls (formerly Alco Controls).

The EK Filter Drier is Copeland recommended.

Emerson's EK Filter Drier can withstand a higher working pressure than any other filter drier on the market.

SUPERIOR MAXIMUM WORKING PRESSURE

The UltraTech Home Series – Simply the Best

The UltraTech Home Series is the industry's premier line of best-in-class, and in some cases, first-to-market heating and cooling solutions. To attain this landmark status, every UltraTech product is built to deliver superior performance.

Every member of the UltraTech Home Series stands alone, delivering unsurpassed performance for its specific application. But when put together, they form the industry's ultimate solution.
